Professional Summary

BCA graduate with internship experience in **AWS DevOps** and **AI/ML**. Skilled in **cloud computing, programming, and data analytics** with proven ability to deliver projects in remote, distributed teams. Demonstrates strong problem-solving, clear communication, and adaptability. Builds proof of skills through open-source contributions, dashboards, and real-world projects. Seeking to contribute technical expertise to organizational success while continuously learning.

Core Skills

- **Cloud & DevOps:** AWS (EC2, Solutions Architecture), Docker, Azure
- **Programming:** Python, Java, C++, SQL
- **Web Development:** HTML, CSS, PHP
- **Data & Analytics:** Power BI, Pandas, scikit-learn, Data Structures & Algorithms
- **Version Control & Collaboration:** GitHub, Jira, Asana
- **Tools:** Microsoft Office Suite, Google Workspace, Android Studio, Unity
- **Soft Skills:** Project Management, Team Leadership, Remote Collaboration (Zoom, Slack, Trello, Microsoft Teams)

Work Experience

AWS DevOps Intern | Reshapp's Solution | Remote | May 2025 – Jul 2025

- Deployed scalable cloud solutions using **AWS EC2** and **Docker**.
- Suggested workflow improvements that reduced deployment inefficiencies.
- Collaborated with distributed teams using GitHub and Jira.

AI/ML Intern | Scholar Minds | Remote | Dec 2025 – Mar 2026

- Applied **machine learning algorithms** to real-world datasets.
- Delivered trial projects demonstrating model accuracy and adaptability.
- Built modular codebases for data preprocessing and model evaluation.

Projects

- **Simple Calculator (Android Studio)** – Developed arithmetic calculator with UI design and backend logic.
- **RFM Analysis Dashboard (Python)** – Designed customer segmentation tool using Recency, Frequency, Monetary analysis.
- **Seating Arrangement Planner (HTML/CSS)** – Built responsive seating plan builder with interactive design.
- **Data Engineering Challenge (Python, HTML)** – Created web crawler and AI-powered data extraction system.
- **Hospital Website (Responsive Design)** – Built modern medical services portal with user-friendly navigation.
- **Community Services Project (CSP)** – Led soil pollution awareness campaigns, clean-up drives, and sustainable practice initiatives.

Education

Bachelor of Computer Applications (BCA)

National Degree College, Andhra Pradesh, India | Aug 2023 – May 2026

Relevant Coursework: OOP, Databases, Data Structures & Algorithms, Operating Systems, Computer Networks, Machine Learning, Data Mining, Mobile App Development, Data Analytics, Web Programming

Certifications

- AWS DevOps Certification(*Certificates available on [GitHub profile](#)*)
- AWS Solutions Architecture
- AI & ML Development
- Data Science Job Simulation
- Data Analytics Certification
- GenAI Powered Data Analytics
- Cyber Security Certification

Additional skills

- **Languages known:** English, Hindi, Urdu
- **Problem Solving:** Identified gaps in workflows and proposed testable solutions.
- **Proof of Work:** Shared dashboards, audits, redesigns, and walkthroughs via GitHub.
- **Trial Projects:** Open to short paid trials to demonstrate fit and output.
- **Async Communication:** Delivered clear updates, documentation, and timezone-respectful collaboration.
- **Persistence:** Followed up with improved clarity and new proof after initial rejections.
